# ACKNOWLEDGMENTS

The *Evolve* publishers would like to thank the following individuals and institutions who have contributed their time and insights into the development of the course:

Antonio Machuca Montalvo, **Organización The Institute TITUELS**, Veracruz, Mexico; Asli Derin Anaç, **Istanbul Bilgi University**, Turkey; Claudia Piccoli Díaz, **Harmon Hall**, Mexico; Professor Daniel Enrique Hernández Cruz, **Fundación Universitaria Unimonserate**, Colombia; Daniel Martin, **CELLEP**, Brazil; Daniel Nowatnick, USA; Daniel Valderrama, **Centro Colombo Americano de Bogota**, Colombia; Diego Ribeiro Santos, **Universidade Anhembi Morumbi**, São Paulo, Brazil; Isabela Villas Boas, **Casa Thomas Jefferson**, Brasília, Brazil; Ivanova Monteros, **Universidad Tecnológica Equinoccial**, Ecuador; Lenise Butler, **Laureate Languages**, Mexico; Lillian Dantas; Professor Lizette Antonia Mendoza Huertas, **Fundación Universitaria Unimonserate**, Colombia; Maria Araceli Hernández Tovar, **Instituto Tecnológico Superior de San Luis Potosí**, Capital, Mexico; Ray Purdey, **ELS Educational Services**; Roberta Freitas, **IBEU**, Rio de Janeiro, Brazil; Rosario Aste Rentería, **Instituto De Emprendedores USIL**, Peru; Verónica Nolvos Arellano, **Centro Ecuatoriano Norteamericano**, Quito, Ecuador.

To our speaking competition winners, who have contributed their ideas:

Ana Netto, Brazil; Andressa Zanfonatto Slongo, Brazil; Betsi García Alonso, Mexico; Carlos Alfredo Reyes, Honduras; Daniela Estefanía Mota Silva, Mexico; Katherine, Ecuador; Marcelo Piscitelli, Brazil; Renata Lima Cardoso Mendes, Brazil; Stephanie, Honduras; Victoria Rueda Leister Pinto, Brazil.

To our expert speakers, who have contributed their time:

Andrea Mendoza, Audrey Decker, Eric Rodriguez, João Glauber Barbosa, Ryoko Mathes, Susanne Gutermuth.

And special thanks to Wayne Rimmer for writing the Pronunciation sections, and to Laura Patsko for her expert input.

Authors' Acknowledgments

A special thanks to all the editorial team, particularly Dena Daniel, whose patience and professionalism helped make this project a pleasure to work on.

The authors and publishers acknowledge the following sources of copyright material and are grateful for the permissions granted. While every effort has been made, it has not always been possible to identify the sources of all the material used, or to trace all copyright holders. If any omissions are brought to our notice, we will be happy to include the appropriate acknowledgements on reprinting & in the next update to the digital edition, as applicable.

Key: REV = Review, U = Unit.

# EVOLVE unit structure

## Unit opening page

Each unit opening page activates prior knowledge and vocabulary and immediately gets students speaking.

## Lessons 1 and 2

These lessons present and practice the unit vocabulary and grammar in context, helping students discover language rules for themselves. Students then have the opportunity to use this language in well-scaffolded, personalized speaking tasks.

## Lesson 3

This lesson is built around an off-the-page dialogue that practices listening skills. It also models and contextualizes useful speaking skills. The final speaking task draws on the language and strategies from the lesson.

## Lesson 4

This is a skills lesson based around an engaging reading. Each lesson asks students to think critically and ends with a practical writing task.

## Lesson 5

*Time to speak* is an entire lesson dedicated to developing speaking skills. Students work on collaborative, immersive tasks, which involve information sharing and decision making.

# CONTENTS

	Learning objectives	Grammar	Vocabulary	Pronunciation
Unit 1 Robot Revolution	<ul style="list-style-type: none"> <li>Discuss the potential uses of robots in everyday life</li> <li>Talk about developments in artificial intelligence</li> <li>Acknowledge arguments and propose counterarguments</li> <li>Write an essay about AI in our homes</li> <li>Present a proposal for a robot helper</li> </ul>	<ul style="list-style-type: none"> <li>Commenting adverbs with future forms</li> <li>Future perfect and future continuous</li> </ul>	<ul style="list-style-type: none"> <li>Using adverbs to add detail</li> <li>Talking about developments in technology</li> </ul>	<ul style="list-style-type: none"> <li>Listening for contrastive stress</li> <li>Saying expressions to show a counterargument</li> </ul>

## UNIT OBJECTIVES

- discuss the potential uses of robots in everyday life
- talk about developments in artificial intelligence
- acknowledge arguments and propose counterarguments
- write an essay about AI in our homes
- present a proposal for a robot helper

# ROBOT REVOLUTION

1

## START SPEAKING

- A Look at the picture. What does it suggest about the future? Do you think it's a realistic vision of the future? Why or why not?
- B In what ways do you think technology will change our lives in the future? What kinds of things (wearable technology, personal robots, AI, etc.) do you imagine we'll have in the next 20 years? The next 40 years? In 100 years?
- C What kinds of robots do we already use? Do you think robots are a positive invention in general? Why or why not? For ideas, watch Eric's video.

EXPERT  
SPEAKER

*What examples can you think of to support Eric's argument and to counter it?*

## LESSON OBJECTIVE

- discuss the potential uses of robots in everyday life

## 1 LANGUAGE IN CONTEXT

- A  1.02 **PAIR WORK** **THINK CRITICALLY** What does the robot in the ad look like? What, and who, do you think it's for? What can it do? What can it probably not do? Listen to the infomercial and check your answers.

 1.02 Audio script

The MiRo robot may look like a toy, but it is far from it. MiRo is a sophisticated piece of robotic engineering, and it is about to **radically** change the field of home health care.

Though still under development, MiRo will **ultimately** be part of a complex system of sensors and communication networks that will **demonstrably** improve the quality of life for elderly people. MiRo robots will live with their owners 24/7, learn their routines, and monitor their movements, which should **drastically** reduce accidents in the home. They will be able to talk to their owners, as well – reminding them to take their medicine and helping them manage appointments and remember visitors' names. And if there's a medical emergency, MiRo will be able to call for help immediately.

Home health care alternatives are **inevitably** going to become a necessity for countries like Japan and the United States, which are facing the challenge of caring for a **progressively** aging population. Social services will certainly not be able to offer human care and companionship for everyone. Although robot companions are bound to be met with resistance initially, robots like MiRo will **undoubtedly** ease the burden on overstretched social services. The greater benefit, however, will be to the elderly people they serve, who often suffer from loneliness and isolation.

MiRo could **feasibly** revolutionize elder care, making the lives of our senior citizens easier, safer, and far more enjoyable.

INTRODUCING  
**MiRo!**

## 2 VOCABULARY: Using adverbs to add detail

- A  1.03 Look at the **bold** adverbs in the script. Which refer to the way something is done (manner)? Which ones are a comment on the action by the speaker (commenting)? Make a chart like the one below and put them in the correct category. Add the other adverbs from the box below. Then listen and check.

comprehensively	dramatically	gradually	increasingly
markedly	potentially	unquestionably	

## Adverbs of manner

radically

## Commenting adverbs

ultimately

- B  Now go to page 141. Do the vocabulary exercises for 1.1.

- C **PAIR WORK** **THINK CRITICALLY** Apart from the elderly, who might benefit from having a robot companion? Why? What problems could it solve? What problems might it create?

### 3 GRAMMAR: Commenting adverbs with future forms

A Read the sentences in the grammar box. **Circle** the correct options to complete the rules.

#### Commenting adverbs with future forms

MiRo **will undoubtedly** ease the burden on overstretched social services.

Home health care alternatives **are inevitably going to** become a necessity.

Social services **will certainly not be able to** offer human companionship for everyone.

1 Adverbs of manner can be placed in different positions depending on what they modify. Commenting adverbs, when used with future forms, are usually placed ...

- <sup>1</sup>before / after the modal verb *will*.
- <sup>2</sup>before / after negative words such as *not* and *never*, or negative contractions such as *won't* and *aren't*.
- <sup>3</sup>before / after the verb *be* in the phrases *be going to*, *be about to*, and *be bound to*.

B **Now go to page 129. Look at the grammar chart and do the grammar exercise for 1.1.**

C **PAIR WORK** Look at the commenting adverbs in the box below. Use a dictionary or your phone to look up ones you don't know. Then add commenting adverbs to the sentences so that they reflect your opinion. Compare with your partner.

certainly	clearly	eventually	evidently
inevitably	surely	undoubtedly	unfortunately

- 1 This century will become the age of the robot.
- 2 Robots are going to change the way we live over the next few decades.
- 3 Robots will never be able to replace the human touch.
- 4 Robots are bound to take over for humans in a lot of different areas.
- 5 The robotics industry is about to make life a lot easier for all of us.

### 4 SPEAKING

A **GROUP WORK** **THINK CRITICALLY** Imagine a robot assistant for the following jobs. What tasks do you think it could feasibly take on? Would it do those tasks better, worse, or as well as a human? What tasks would the human still have to do? Use commenting adverbs to make your attitudes clearer.

- a clerk in a hotel
- a nurse in a hospital
- a teacher in a kindergarten

As a hotel clerk, a robot will undoubtedly be more accurate than a human. It might even be friendlier!

B As a class, share the most interesting uses for a robot assistant that your group came up with. Then discuss whether robot assistants are inevitable. Give reasons to support your opinion.

- talk about developments in artificial intelligence

## 1 LANGUAGE IN CONTEXT

- A How would you define *artificial intelligence*? Does the idea scare you, worry you, or excite you? Why or why not?
- B  1.04 Listen to part of a podcast interview in which a tech industry reporter talks about developments in AI. How will AI be used in the near future? How does the host feel about these uses?

### 1.04 Audio script

**Reporter** Industry experts predict that, by the end of the next decade, **chatbots** will have replaced humans in all customer service call centers, but you won't even know you're talking to one. **Computer-generated speech** will have improved so much that chatbots will sound just like humans.

**Host** We'll be having conversations with computers and not even know it? Impressive.

**Reporter** Plus, researchers are developing an app to help blind people "see." It will use the camera on their smartphone to capture the area around them. Then, using a combination of **image-recognition** software and **speech to text**, the app will convert the images into speech. Developers are integrating **facial recognition**, too, so the app can announce when a friend is approaching. They have a **working prototype** now, and they're pretty confident they will have developed a **beta version** for testing by the end of next year!

**Host** What a great use of technology! What other developments can we expect to see soon?

**Reporter** Facial-recognition glasses – they'll be linked to police databases to help pick out suspects in a crowd.

**Host** Really? I'm not sure how I feel about that one.

- C **PAIR WORK** **THINK CRITICALLY** Why does the host feel nervous about the police using facial-recognition glasses? What are some other possible uses for that technology? What pros and cons can you think of?

## 2 VOCABULARY: Talking about developments in technology

- A  1.05 **PAIR WORK** Look at the technology terms in the box. Write them in the chart for all the things they are associated with. Use a dictionary or your phone to help you. Listen and check.

artificial intelligence (AI)	beta version	chatbot	facial recognition
computer-generated speech	computer translation	image recognition	operating system (OS)
virtual assistant	voice activation	voice recognition	working prototype
text to speech / speech to text			

Home computers	Smartphones	Airport security	App development	Social media
OS	chatbot	facial recognition		

- B **PAIR WORK** Which item from the box above is not yet commonly used? How long do you think it will be until it is part of daily life?

- C  Now go to page 141. Do the vocabulary exercises for 1.2.

FIND IT

### 3 GRAMMAR: Future perfect and future continuous

A Read the sentences in the grammar box. **Circle** the correct options to complete the rules.

#### Future perfect and future continuous

By the end of the next decade, chatbots **will have replaced** humans in call centers.  
We'll **be having** conversations with computers and not even know it?

- 1 Use the future perfect and the future continuous to ...
  - a describe situations in the future.
  - b make suggestions for things to do in the future.
- 2 Use *will + have + past participle* (future perfect) to talk about ...
  - a actions that will be in progress at a given time in the future.
  - b actions that will be completed before a given time in the future.
- 3 Use *will + be + verb + -ing* (future continuous) to talk about ...
  - a actions that will be in progress at a given time in the future.
  - b actions that will be completed before a given time in the future.

B **Now go to page 129. Look at the grammar chart and do the grammar exercise for 1.2.**

C **PAIR WORK** You are going away this weekend to an unfamiliar location. A friend asks you a lot of questions about your trip. Use the prompts to write the questions in either the future perfect or the future continuous, and check your accuracy. Compare with a partner.

- 1 a How / travel / there ?  
*How will you be traveling there?*  
b Who / meet / there ?  
c What activities / do ?
- 2 a By the time the weekend is over, who / speak to ?  
b What / see ?  
c What / do ?

#### ACCURACY CHECK

Remember not to change the form of *be* in future continuous.

*It'll is raining by the time we get there. X*  
*It'll be raining by the time we get there. ✓*

D **PAIR WORK** Answer the questions in exercise 3C and create a story about your weekend trip to tell your partner. Share your stories with another pair of students.

### 4 SPEAKING

A **GROUP WORK** Make a list of ten machines and gadgets you have in your home right now. How does each one help you or make life easier? Which of them do you think you'll still be using ten years from now? Will you be operating them, or will they depend on AI? For ideas, watch Eric's video.

EXPERT  
SPEAKER

*How similar are your predictions to Eric's?*

B What ordinary tasks or common devices today will have been replaced by AI by the year 2050?

*I think facial-recognition technology will have replaced house and car keys long before 2050!*
